# CASAGAMI

## TOTEMIC

CASAGAMI is a range of tiny solar nightlights designed and assembled in France. To assemble, customize and collect. It is a fun, engaging and educational concept that embodies the core principles of Sustainable Development.

Created 10 years ago, more than 1 Million units manufactured since 2013.

### COMPOSITION

- A 310g Rochcoat PEFC cardboard pre-cut house (size 11.93 x 8.46in folded in 2)
- A patented, adhesive solar module SW 939
- A flat cardboard envelope size C5 (6.4 x 9.0in)

The adhesive solar Module SW939 is composed of a blue or orange Light Emitting Diode (LED), an amorphous solar panel, a chargeable LIR 2023 battery, an ON/OFF switch.

### Weight and dimensions

Total weight: 1.9oz / Net weight: 1.2oz  
Package Dimensions: 6.38 x 9.02 x 0.43in  
House dimensions: 3.15 x 2.56 x 2.95 in

Standard solar module comes with an orange LED.  
Blue light available upon request : Add a «B» to the item's reference on your order. For instance, to purchase a CASAGAMI Original Kraft with a blue Led, use the reference «2001B» instead of «2001»

Retail Price : 9€

# CASAGAMI (CONT'D)

Easy to assemble without glue or scissors.

5 hours facing the incoming sunlight yield 5 hours of LED light.

Good to know: the LED automatically turns OFF if the daylight is bright enough, enabling the solar panel to resume charging.

## COLLECTION MAISONS DE FRANCE

Since 2013, «Maisons de France» collection releases fresh designs every year.

Each house embodies the spirit and the style of a French Province or a particular place in France.

# CASAGAMI (END)

Easy to send by mail, Casagami is often chosen as an iconic gift for both the young and the young at heart, evoking fond moments.

The Arty collection is the result of a collaboration with 4 French artists: Myriam Maxo, Thomas Canto, Maité Sant, and Gris 1.

While the Maison du Monde collection caters to travel enthusiasts, the colorful Déco collection is perfect for any occasion.

# CASAGAMI LIGHTHOUSE

NEW

Our blinking star !

This new Casagami dazzles using our innovative «Flashmodule,» sparking when exposed to any light source (preferably daylight), without batteries or complicated electronics. The assembly of this CASAGAMI, inspired by the quaint lighthouses dotting the Atlantic coasts, demands precision, while its usage remains simple.

## COMPOSITION:

- A 305g/m2 graphic cardboard pre-cut lighthouse
- A solar flashmodule
- An instruction leaflet
- A flat cardboard envelope size C5 (6.4 x 9.0in)

The adhesive solar module Flashmodule is composed of an amorphous solar panel and a blinking white Light Emitting Diode (LED)

## Weight and dimensions

Total weight: 2.47oz / Net weight: 1.77oz  
Package Dimensions: 6.38 x 9.02 x 0.47in «  
House dimensions: 7.28 x 2.36 x 2.36 in  
Assembled without glue or scissors

Retail price 10€

# CASAGAMI MAX **NEW**

SUNPOWER®

## The most powerful

Experience the solar panel that powered Bertrand Piccard's «Solar Impulse» aircraft during its pioneering zero-emission World tour.

In partnership with MAXEON, you too can pioneer a New low carbon World.

With our collection of very powerful nightlights. One day in the sun charges the tiny house for the whole night.

*Twice the size, twice the power*

### COMPOSITION

- A 550g Oudin cardboard pre-cut house (size 16.53x9.25 in)
- A patented, adhesive solar module SW 939SP SUNPOWER
- An instruction leaflet
- A flat cardboard envelope size C5 (6.4 x 9.0in)

The adhesive solar module SW939 SP is composed of a SUNPOWER solar panel, the most efficient polycrystalline panel in the world, a blue Light Emitting Diode (LED), a chargeable LIR 2023 battery, an ON/OFF switch.

### Weight and dimensions

«Total weight: 2.58oz / Net weight: 1.87oz  
Package Dimensions: 6.38 x 9.02 x 0.51in «  
House dimensions: 4.13 x 3.35 x 3.94 in

Retail price: 13€

# CASAGAMI +

The most ecological

... but also the biggest of the Casagami.

It's powered by an organic photovoltaic solar film developed by ASCA.  
An ecological technology derived from carbon without rare earth or toxic products. Made in France.

5 hours charging in the sun = 5 hours of light

## COMPOSITION

- A 360g PEFC cardboard pre-cut house (size 29.72x8.66 folded in 3)
- An ASCA solar film
- A chargeable luminous module
- An instruction leaflet
- A flat cardboard envelope size C4 (12.8 x 9.0in)

The ASCA solar film is manufactured in Nantes  
It charges the electronic module  
SW3609 composed of a colour changing LED, a battery and an ON/OFF switch.

Weight and dimensions

«Total weight: 7.05oz / Net weight: 5.11oz

Package Dimensions: 12.75 x 9.02 x 0.51in «

House dimensions: 6.29 x 5.12 x 5.9 in

Models: 2000 KR / Kraft model

2000MA / Manor model

Assembly without glue or scissors

Retail Price: 15€

# CASAGAMI GREEN HOUSE

« In the beginning, a drop of water and a particle of light ignited the human journey, sparking the wonder of life on Earth... To reinforce the vital link between nature and us, human beings, while preserving our planet, we must all together find solutions.

Join Drop & Foton as they lead us on an exploration of the core principles of Sustainable Development through fun experiments in this ecological greenhouse.

An object to draw, color, and build as a family, showcasing the astonishing power of a ray of light and a few drops of water through scientific experimentation.

## COMPOSITION

- A 615g/m2 recycled cardboard pre-cut greenhouse and support.

- A blue LED adhesive solar module, designed in France.

- A small hemp mat, 100% natural as a substrate to grow the seeds. Produces and cut in Aachen (Germany). Size 2.76 x 2.76in. Thickness 0.39in

- A packet of organic watercress seeds (over 500 seeds)

- A instruction leaflet

Dimensions :

Flat 23.6 x 5.9in

Assembled 4.1 x 3.8 x 2.7in

Support 5.8 x 6.9 x 0.04in

Packaging 6.4 x 9.0 x 0.5in

Total weight 3.14oz

Retail price 16€

# CASAGAMI FLUO **NEW**

The simplest

This new Casagami operates without electronics or batteries. Exposed to the daylight, this tiny nightlight's photoluminescent details will glow in the dark for about 20 minutes. Providing enough time to guide children into the realms of dreams.

## COMPOSITION

A 250g PEFC cardboard pre-cut house.

Size 11.93 x 8.46in  
A white envelope 5.9 x 5.9in

Dimensions assembled 3.35 x 2.56 x 2.95in  
Total weight 0.67oz . Net weight 0.39oz.

Inkjet printing on coated cardboard.  
Photoluminescent ink applied using  
silk-screen printing.  
Cut in Agen (France)

Folded and shipped from a French ESAT  
(Sheltered Workshop)

# AUTOGAMI

It cuts through the wind at 1.2 mph !

Autogami is a small cardboard car powered by solar energy. Simply charge it in the sunlight near a window during the day. Once fully charged, it can run for approximately 25 minutes.

## COMPOSITION

A pre cut PEFC cardboard, sourced from Savoy (France). Recycled cork wheels, crafted in the Landes (France) and a proprietary «solarbase» designed by Litogami.

Assembled in Agen (France). Packaged at a Sheltered Workshop (ESAT)

Solarbase specifications : Engine: 1.2V 80MAH  
NiMH battery: 3.6V  
Polycrystalline PV : 3.6V

Dimensions (box): 9.02 x 6.38 x 0.79in  
Dimensions (assembled): 3.74 x 1.77 x 2.95in  
Total weight: 2.82oz Net weight: 1.48oz  
Retail price: 14€

# CITIGAMI

It sparkles endlessly harnessing the energy of light.

18 white LEDs and an ASCA Solar film assembled on an easel power an interchangeable perforated card.

4 models of cards: Black Eiffel Tower / Coloring of the Eiffel Tower / Coloring of Christmas tree / Blank customizable card. To experience Photovoltaic energy and let your creativity shine.

Powered by photovoltaic energy. Made in France

## COMPOSITION

- A 310g PEFC cardboard precut model
- An ASCA solar film
- A chargeable module
- A cardboard envelope size C4 (12.8 x 9.0in)

Enveloppe dimensions: 9.02 x 6.38 x 0.19in  
Dimensions assembled: 8.27 x 5.9 x 1.18in

ASCA solar film is made in Nantes (France), from carbon-based materials, without rare earth or toxic products. Its long-lasting design powers the LEDs system for over 10 yrs
